

Allergies and Allergic Reactions

At **The Mulberry Bush** we are aware that children may have or develop an allergy resulting in an allergic reaction.

We aim to ensure allergic reactions are minimised or, where possible, prevented and that staff are fully aware of how to support a child who may be having an allergic reaction.

Our procedures

- All staff are made aware of the signs and symptoms of a possible allergic reaction in case of an unknown or first reaction in a child. These may include a rash or hives, nausea, stomach pain, diarrhoea, itchy skin, runny eyes, shortness of breath, chest pain, swelling of the mouth and/or tongue, swelling of the airways to the lungs, wheezing and anaphylaxis
- We ask parents to share all information about allergic reactions and allergies on their child's registration form and to inform staff of any allergies discovered after registration
- We ask parents to provide the setting with a formal letter from the child's GP or other relevant healthcare practitioner (eg; paediatric dietician) highlighting the child's allergy and the precautions to be taken in the event that the child has an allergic reaction. We give parents 3 months to provide the setting with this letter. After this time the setting will not accommodate allergy precautions
- We share all information with all staff and keep an allergy register in the office
- Where a child has a known allergy, the nursery manager will ensure that a Health Care Plan is completed with the parent prior to the child starting the nursery and/or following notification of a known allergy and this assessment is shared with all staff. This may involve displaying photos of the children along with their known allergies in the kitchen or nursery rooms, where applicable
- The nursery will take all reasonable measures to ensure that the chance of contamination of foods prepared for children with allergies is minimised and
- The manager, nursery cook and parents work together to ensure a child with specific food allergies receives no food at nursery that may harm them. This may include designing an appropriate menu or substituting specific meals on the current nursery menu
- Seating is monitored for children with allergies. Where deemed appropriate, staff will sit with children who have allergies and, where appropriate, staff will discuss food allergies with the children and the potential risks
- If a child has an allergic reaction to food, a bee or wasp sting, plant etc. a paediatric first aid trained member of staff will act quickly and administer the appropriate treatment, where necessary. We will inform parents and record the information in the incident book
- If an allergic reaction requires specialist treatment e.g. an EpiPen, then at least two members of staff working directly with the child and the manager will receive specific medical training to be able to administer the treatment to each individual child.

Food Information Regulations (FIR) 2014

We incorporate additional procedures in line with the FIR, including displaying our weekly menus on the parent information board, website or online system identifying any of the 14 allergens that are used as ingredients in any of our dishes.

In the event of a serious allergic reaction and a child needing transporting children to hospital

The nursery manager or staff member will:

- Call for an ambulance immediately if the allergic reaction is severe. Staff will not attempt to transport the sick child in their own vehicle
- Ensure someone contacts the parents whilst waiting for the ambulance and arrange to meet them at the hospital
- Arrange for the most appropriate member of staff to accompany the child, taking with them any relevant information such as registration forms, relevant medication sheets, medication and the child's comforter
- Redeploy staff if necessary to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together
- Inform a member of the management team immediately
- Remain calm at all times and continue to comfort and reassure the child experiencing an allergic reaction. Children who witness the incident may also be well affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the incident
- Where a serious incident occurs and a child requires hospital treatment, Ofsted will be informed.

This policy is updated at least annually in consultation with staff and parents and/or after a serious incident.

This policy was adopted on	Signed on behalf of the nursery	Date for review
